Professional Summary

Active 4th-semester Informatics Engineering student at Politeknik Negeri Batam specializing in information system development and relational database management. Highly passionate about applying software engineering and analytical skills to support the digital transformation of energy management and automation at Schneider Electric Batam Plant.

Core Skills

- Programming & Web: PHP, JavaScript, HTML, CSS, Python, Object-Oriented Programming (OOP).
- Databases: MySQL, SQL Relational Database Architecture.
- Methodologies & Tools: Agile, Prototyping, Quality Assurance (QA), Software Testing.
- Soft Skills: Problem Solving, Teamwork, Time Management, Industry Standards Compliance.

Project Experience

Web-Based Futsal Field Reservation Application

Role: Full-Stack Developer & Database Designer | Aug 2024 - Dec 2024

- Developed an integrated web application to digitalize field booking, successfully reducing scheduling conflicts (double-booking) by 100%.
- Designed and optimized a MySQL relational database to manage 50+ real-time field availability data, customer records, and transaction histories efficiently.
- Built a responsive UI/UX that improved the operational efficiency of field management by 30%.

Web-Based Musical Instrument Rental and Studio Booking Application

Role: Full-Stack Developer | Feb 2025 - July 2025

- Built an interactive rental platform enabling customers to view live inventory of 100+ musical instruments and studio slots.
- Implemented a systematic rental workflow from cart management to estimated return tracking, ensuring 0% data discrepancy.

AI Project: RambUILD (Indonesian Traffic Sign Recognition Application)

Role: AI Engineer & Developer | Sept 2025 - Jan 2026

- Built an AI-based image classification model using Python to accurately recognize 30+ types of traffic signs in Indonesia.
- Conducted structured image data preprocessing and training, achieving a system accuracy rate of 97%.

Comparison between Naive Bayes and K-Nearest Neighbour Algorithms for Document Archiving

Role: Full-Stack Developer & Database Designer | Mar 2026 - July 2026

- Developed a web-based archive management application to automate document classification, accelerating data retrieval time by 40%.
- Tested and compared the accuracy of Naive Bayes and K-NN algorithms across 8 rows of testing scenarios to achieve optimal automated sorting performance.

Education

- Associate Degree (D3) in Informatics Engineering | Politeknik Negeri Batam 2024 - Now
- State High School 8 Batam 2021 - 2024
